Course objectives: Seminar in algebraic geometry, to educate graduate student, postdoctoral, and faculty participants about current research in the field; most presentations are by outside experts.

Textbook: none required

Assessment: The grade will be on a Satisfactory/Unsatisfactory scale, based on attendance.

Attendance: Regular attendance is expected.

Accommodations: Any student with a documented disability seeking academic adjustments or accommodations should speak with one of us during the first two weeks of class. Students with disabilities will need to also contact Disability Support Services in Allen Center.
